Airbus CyberSecurity: a specialised provider protecting critical infrastructure, institutions, defence and enterprise

- We are the dedicated cyber security business of Airbus
- We are a 100% fully owned subsidiary of the Defence and Space division
- We develop and deliver reliable, high-grade products and services to protect, detect and respond to increasingly sophisticated cyber-attacks 24/7
- We are the only cyber security company with a sovereign presence in France, Germany, the UK and Spain

What we do

Identify Protect Detect Respond

4 Security operations centres protecting customers
28 Innovative research projects
900 Cyber Professionals across Europe
30% Revenue Growth in 2019

Why are investments in cyber security critical?

“For all of our customers, trusting their IT and OT (operational technology) systems is vital for their digital transformation and the successful delivery of objectives. Resilience becomes both a competitive advantage and a commodity in a market in which half of organisations already work with more than one external cyber security provider.

Through our industrial DNA combined with decades of experience with defence systems, we at Airbus CyberSecurity have a deep understanding of the challenges faced by our customers such as managing complex infrastructure and sensitive data. We help them to assess, build, run and maintain protection solutions tailored to their environment and priorities.”

Markus Braendle, Head of Airbus CyberSecurity
IDENTIFYING RISKS AND INCREASING AWARENESS
- Information security strategy and policy
- Risk & maturity assessments
- Training for all levels of an organisation
- Asset discovery & vulnerability checks
- Penetration testing & red teaming
- CyberRange training and simulation platform

RESPONDING TO INCIDENTS
- Computer Security Incident Response Team (CSIRT) for incident response and forensics

IDENTIFYING RISKS AND INCREASING AWARENESS
- Information security strategy and policy
- Risk & maturity assessments
- Training for all levels of an organisation
- Asset discovery & vulnerability checks
- Penetration testing & red teaming
- CyberRange training and simulation platform

DETECTING THREATS
- Security Operations Centre (SOC) for IT/OT
- Cyber Threat Intelligence
- Orion Malware analysis platform

PROTECTING ASSETS AND NETWORKS
- Design of tailored solutions
- Trusted Infrastructure / High-grade encryption
- Secure Exchange Gateway (SEG)
- Stormshield: network security (VPN, firewalls), data and endpoint security

In a nutshell

A leading European provider protecting EU institutions

A trusted partner for Airbus, Governments and Critical Industries

An end-to-end integrator for IT and OT industrial cyber security

Unique experience with platform security and embedded systems
